

Remote Work Setup Checklist for Dharamshala

Internet Connection

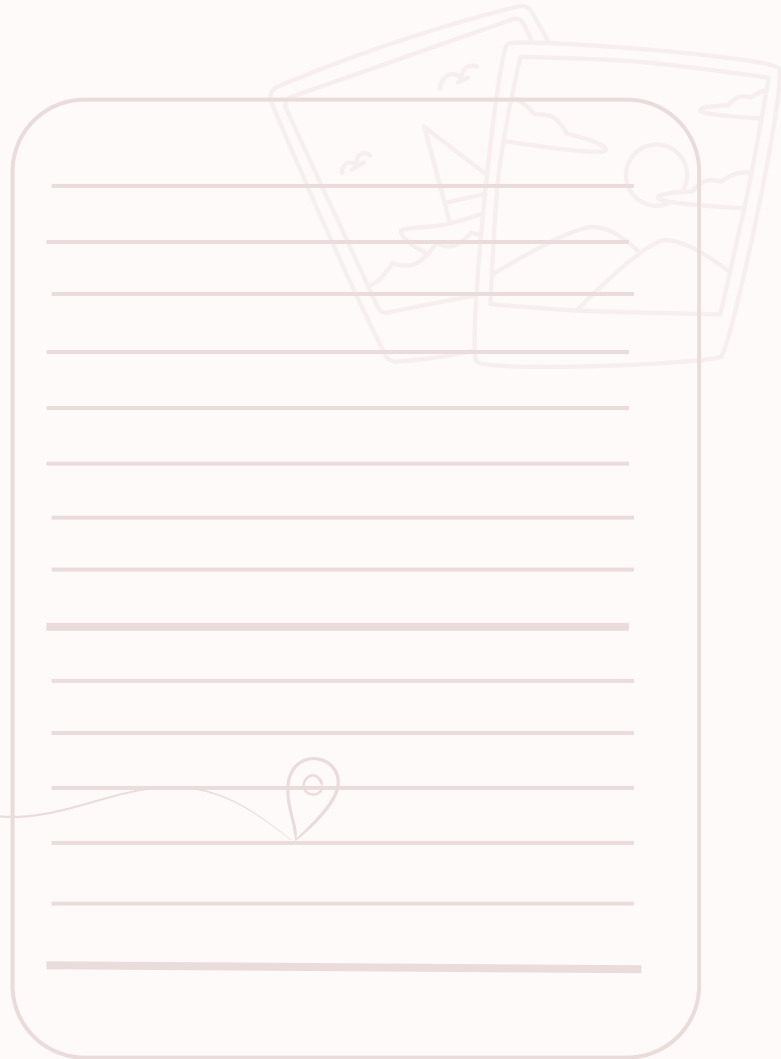

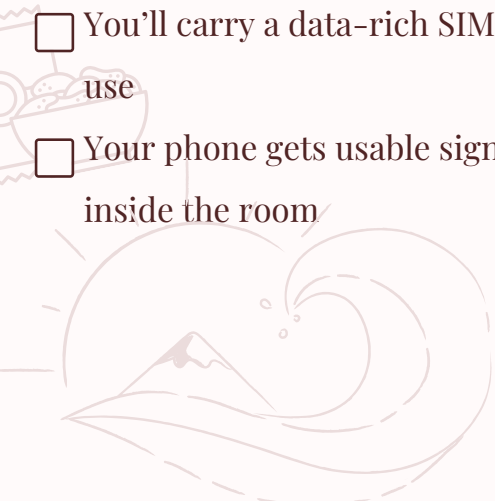

- Host has shared a recent speed test screenshot taken inside the room
- Internet speeds are suitable for video calls (ideally 30 Mbps+ download)
- You know the broadband provider (Airtel Fiber, Jio Fiber, or local ISP)
- Wi-Fi router is located inside the house, not in a distant common area

Power backup

- Property has inverter or generator backup
- Wi-Fi continues working during power cuts
- You're carrying a laptop power bank or long battery backup
- You have a small UPS option for the router (helpful for short outages)

Mobile Data Backup

- You checked network coverage maps for Jio/Airtel in that area
- Host confirmed which mobile network works best indoors
- You'll carry a data-rich SIM plan for hotspot use
- Your phone gets usable signal strength inside the room

Workspace Comfort

- There's a table and proper chair, not just a bed setup
- Power sockets are near the workspace
- The room gets natural light (helps for long work hours)
